INPUT CONTRACT
Frozen F; target location z
Anchor IDs and contexts
Support and preprocessing
SAME-TARGET PAIRS
Vary anchor identity
Record geometry differences
Predictions A, B; difference D
AUDIT OUTPUT
Hidden common error
Influence stability
Ranking scope and failures
LOCAL INFLUENCE
Embedded linear coefficients, or
matched neural anchor perturbations
Use ALL-anchor response energy
Check amplitude/sign stability
RETROSPECTIVE EVALUATION
GT: alignment and error-energy fractions
Resample examinations / patients
Retain failed models and NA endpoints
Disclose historical GT masks / scales
