Disagreement observes error differences: $f_A - f_B = e_A - e_B$
PHYSICAL EVIDENCE
RECONSTRUCTION ERRORS
OBSERVED DISAGREEMENT
SHARED
same anchors reused in contexts A and B
aligned errors $e_A \approx e_B$
small $|f_A - f_B|$ shared error hidden
DISJOINT
different physical anchors in contexts A and B
context-sensitive errors remain different
larger $|f_A - f_B|$ error remains visible
